

STATE	PROJECT NO.	YEAR	SHEET NO.	TOTAL SHEETS
KANSAS	472-84890	2010	25	59

**T-Wall Retaining Wall System
(Alternate #2)**

NOTE: Submit seven copies of bracing, shoring details and design calculations to be used for track protection for approval by the Railroad Company and the Engineer. A registered professional engineer shall design and seal these drawings and calculations.

APPLICABLE RAILROAD LIVE LOAD; COOPER E80

NOTE: Drilled Shafts located within the Railroad Live Load influence shall be cased.

TRACK PROTECTION SHORING REQUIREMENTS

(All dimensions are measured perpendicular to ϕ track.)

NOTE: The location of the theoretical lines that denote the "Zones of Influence" do not necessarily correspond to the geometrics of the track. Use the applicable shoring requirements within the defined zones.

Limits of temporary construction

CONSTRUCTION CLEARANCE DETAILS

* Clearances may not be attainable at all locations. If the clearances cannot be met, see the Construction Layout sheet for a sketch of Railroad approved clearances.

**21'-6" is preferred 21'-0" is the Railroad Minimum

RAILROAD PROTECTION: Execute the work in such a manner and take any precautions necessary to prohibit broken concrete and other debris from falling on and damaging the rails, ties, ballast or other railroad property. As much as possible, do the work so as not to interfere with the normal use of the tracks. The Railroad Company and the Engineer shall approve the methods of protection proposed by the Contractor before any work begins.
