SECTION A-A

REAR WALL

SECTION E-E
(Reinforcing steel not shown.)

GRATE AND FRAME

PLAN

GENERAL NOTES

Class A Concrete, Class A Concrete (AE), or the mix used in Concrete Pavement, at the Contractor's option, shall be used throughout.

All exposed edges shall be finished with an edging tool. Reinforcing bars shall be bent around pipe.

No reduction in concrete quantities shall be made for pipe openings.

When directed by the Engineer, a small opening in the back of the inlet shall be provided in order to drain a low area. Reinforcing bars shall extend through the opening. No reduction in concrete quantities will be made for this opening.

The floor of the inlet shall be shaped as shown in various "EXAMPLES" on Reinforced Concrete Manhole Standard Drawing RD730 SI.

No addition in concrete quantities shall be made for shaping floor of inlet.

No reduction in pay length of curb, gutter, or curb & gutter will be made through the inlet area.

All exposed structural steel shall be painted with a coat of inorganic zinc primer and then with a topcoat or a field coat of organic zinc, each coat to be 0.076 mm to 0.1 mm.

All structural steel shall comply with ASTM A-36M, A-242M, or A-441M.

Curb and Gutter sections shall be shaped as shown where required by the installation of curb inlets. This work shall be subsidiary to other bid items.

See sheet entitled "Reinforcing Steel for Inlets and Manholes" for details and quantities.

Welded Structural Steel Grate & Frame
Mass = 68 kg Each (With Cross-bars)

Note: To prevent grate from rocking on bearing angles, machine finish surfaces indicated thus "f".

On all interstate projects and rural area projects, the two 13 mm phi x 460 mm bars are to be omitted. The mass of the grate and frame without these bars is 67 kg of structural steel.
