

LILAC LANE PAVING

FROM THE NORTH LINE OF E PIKE ST, NORTH TO THE SOUTH LINE OF E MORRIS ST

CITY OF WICHITA, KANSAS

Paul Gunzelman, P.E. Interim City Engineer
Project Number: 472-2023-085850

SHEET INDEX

Title Sheet	1
Asphalt Paving Detail	2
E Pike St	3-4
Erosion Control Plan	5
Erosion Control BMP Details	6-10
Cross Sections	11
Coordinate Sheet	12
Copy of Plat	13-14

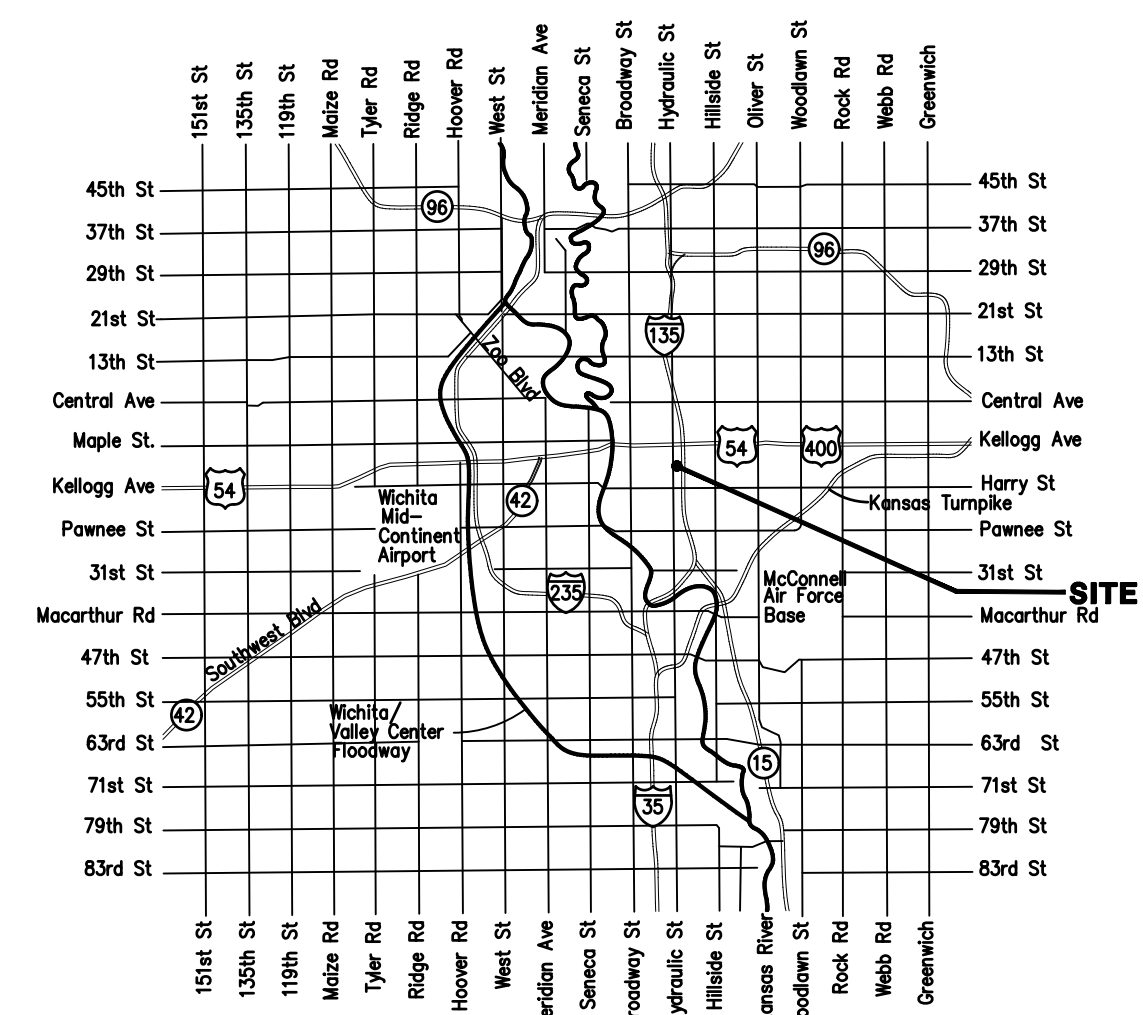

GENERAL NOTES:

- Contractor will be required to provide notice to utility companies a minimum of forty-eight (48) hours prior to any excavation, as follows:
Kansas One-Call 687-2470
The Contractor must notify the following in case of an emergency:
Cox Communications 262-4270
Kansas Gas Service 1-888-482-4950
Evergy 383-8650
Black Hills Energy 1-800-303-0357
ATT 268-2245
City of Wichita Water Dept. 268-4563
City of Wichita Sewer Maint. 268-4024
City of Wichita Storm Sewer Maint. 268-4090
City of Wichita Traffic Maint. 268-4034
Conoco Phillips Pipeline Co. 1-877-267-2290
Southern Star Pipeline Co. 529-6600
Kinder-Morgan Pipeline Co. 1-888-844-5658
- Utility service lines, poles, valve boxes, meters, and etcetera are to be adjusted as necessary by others prior to construction unless the plans specifically call for their adjustment by the Contractor or unless the plans specifically identify a utility to be adjusted by its owner during construction. Existing utilities and their location, as shown on the plans, represent the best information obtainable for design. The Contractor will be required to work around existing utilities within the right-of-way which do not conflict with proposed construction.
- Rubble from the removal of miscellaneous structures and excess excavation which is to be wasted shall be disposed of on sites to be provided by the Contractor. These sites shall be approved by the Engineer as to suitability, appearance and site location. Locations, in the opinion of the Engineer, that will leave an unsightly appearance will not be approved. All disposal sites must be approved by the Kansas Department of Health and Environment. Material either stockpiled or disposed of in a flood plain would require a Kansas State Board of Agriculture permit. Any material dumped in waters of the United States or wetlands is subject to U.S. Corps of Engineers permitting regulations. Any material buried or stockpiled beyond approved construction limits would require additional archaeological investigations unless buried in a previously approved borrow location.
- Trees and shrubs in public right-of-way which are in direct conflict with proposed new construction shall be removed by the Contractor ONLY with the City's approval. Trees and shrubs which are not in direct conflict with proposed new construction shall be saved and protected from damage.
- The Contractor shall give all property owners and/or tenants of developed property abutting the construction of this project a minimum of ten (10) days notice prior to start of construction.
- The Contractor shall be responsible for preserving property irons. The Contractor will be required to re-establish any property irons which are damaged or destroyed by his construction operations. Such irons shall be re-established by a licensed Land Surveyor in accordance with state laws.
- All existing and proposed erosion control measures including silt fencing, erosion control mat, straw bales, inlet barriers, and const. entrance shall be maintained throughout construction by the Contractor and until project is accepted by the City of Wichita. The on-site Engineer shall complete weekly reports on the status of erosion control measures. The Contractor shall be required to comply with maintenance and/or replacement of erosion control measures as determined by the on-site Engineer until project is accepted by City of Wichita.
- A saw cut of at least one-half the depth of existing surface courses or one-fourth the depth of the existing total pavement thickness shall be provided at locations where proposed construction abuts the existing surface course or pavement for which partial removal of that surface or pavement is required. Sawed joint to facilitate removal within three (3) feet of existing joints will not be permitted and for such instances the limits of removal shall extend to the existing joint. Such saw cuts will not be paid for directly and this cost shall be considered as subsidiary to the removal of the surface or pavement.
- All areas disturbed during construction shall be seeded, mulched, and fertilized as follows (Permanent Seeding):
Seed: Kansas Premium Fescue Blend: 8 lbs./1000 sq. ft.
Mulch: Prairie Hay: 2 tons/acre (in areas not covered by erosion control blanket).
Fertilizer: 12-24-12: 45 lbs./acre
- Excess excavation shall be removed from this site and disposed of by the Contractor.
- WEST SIDE**
Contractor shall coordinate access to Lots 3 & 4 on west side of Lilac Lane during construction. Lots 5-8 do not require access during construction.
EAST SIDE
Lots 16-18 & 21 all have rear garage access. Contractor to coordinate with residents for temporary restriction limited to their front access on Kansas Ave. during construction.

BENCHMARKS

BENCHMARK #1
Square cut set in NW corner of conc. light pole base.
Approx. 100' south and 30' East of the intersection of Lilac & Pike St
Elev. = 1296.61 (NAVD88, GEOID18)

BENCHMARK #2
Square cut set in top curb
West curb return, north end of drive
Approx. 20' north and 7' East of the intersection of Lilac & Morris St
Elev. = 1291.63 (NAVD88, GEOID18)

VICINITY MAP

Project Earthwork Totals (CY unadjusted for shrink & swell)			
Excavation Compacted Fill Loose Fill*			
Street (R/W)	376	0	0
Total Project Length			
408 L.F. = 0.08 Miles			
* Not a bid item			

PROPOSED STREETS:

Apr. 24, 2023
